POWER FITNESS GYM

Fitness Center and Workout Programs Webpage

Consolidated Project Report

B.Tech CSE Student | Web Development Project

HTML + CSS | Beginner Web Development Project

1. Project Overview

Project name	Power Fitness Gym – Fitness Center Webpage
Objective	To create a fitness website displaying workout programs, trainer details, membership information, and contact information for a gym.
Technologies used	HTML for webpage structure and CSS for styling, layout, hover effects, and responsive design.
Design theme	Black, orange, white, light blue, and grey colors for a bold fitness-focused appearance.

2. Webpage Preview

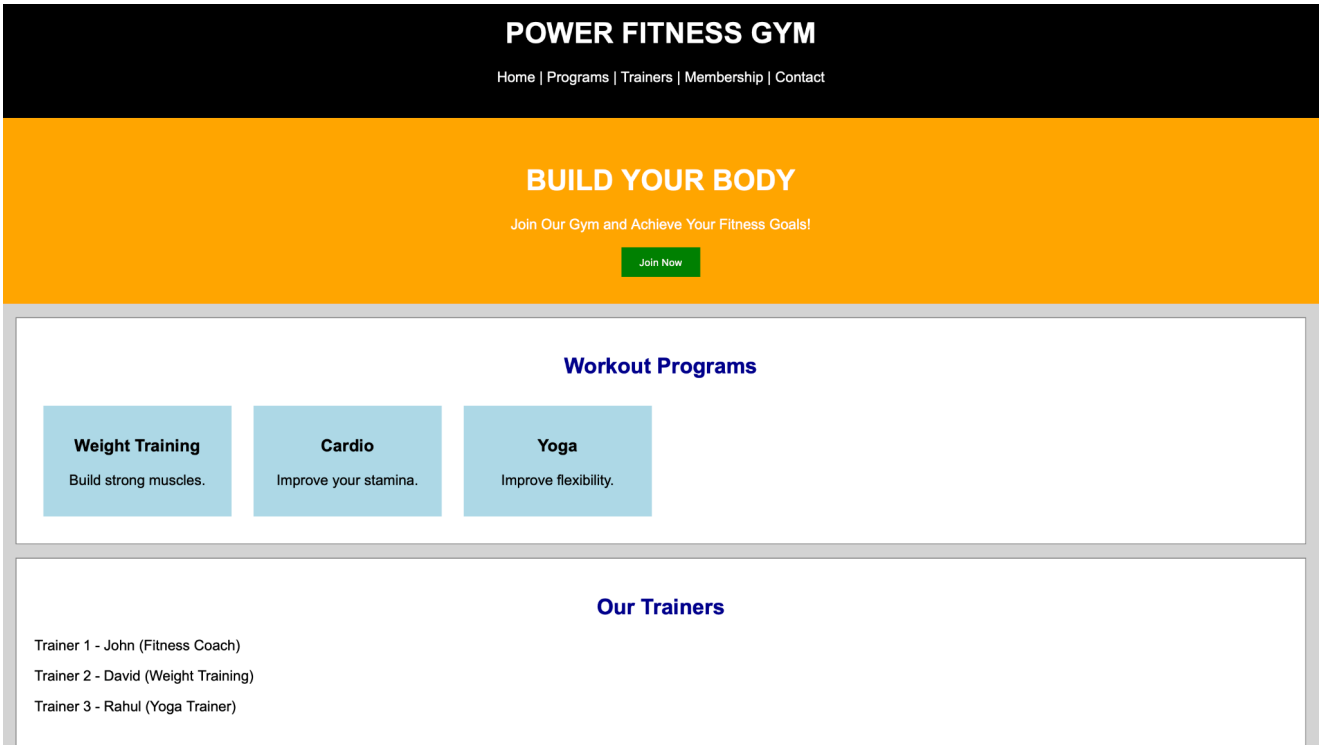

Figure 1. Actual Power Fitness Gym webpage preview supplied by the user.

3. Main Features

Feature	Description
Header and navigation	Displays the POWER FITNESS GYM heading and navigation links for Home, Programs, Trainers, Membership, and Contact.
Welcome banner	Displays the BUILD YOUR BODY heading, a fitness message, and a Join Now button.
Workout programs	Displays Weight Training, Cardio, and Yoga with short descriptions.

3. Main Features

Feature	Description
Our trainers	Displays trainer names and their roles, including fitness coach, weight training, and yoga trainer.
Membership	The navigation menu includes a Membership link for the gym membership section.
Contact	The navigation menu includes a Contact link for contact information.
Hover effects	Workout program cards change their background color on hover, and the Join Now button changes color when hovered.
Responsive layout	CSS media queries adjust program card width and table font size for smaller screens.

4. HTML and CSS Summary

HTML defines the gym header, navigation menu, welcome banner, workout program cards, trainer information, membership and contact navigation links, and footer. CSS controls the black and orange theme, typography, spacing, program cards, section borders, hover effects, and responsive layout.

5. Limitations

The webpage is a front-end demonstration using HTML and CSS. The uploaded source code contains the header, welcome banner, workout programs, and trainer information, while the navigation also lists Membership and Contact. No backend, database, online membership registration, or live gym management system is connected.

6. Conclusion

The Power Fitness Gym website is a beginner-friendly static webpage demonstrating HTML and CSS concepts. It presents gym branding, a welcome banner, workout programs, and trainer information using a clear layout. CSS hover effects and responsive styling improve the webpage presentation.

Appendix A – Source Code

Original HTML and CSS source code supplied by the user. Long lines are wrapped for page display.

```
<!DOCTYPE html>
<html>
<head>
    <title>Fitness Center</title>

    <style>
        body {
            font-family: Arial;
            margin: 0;
            background-color: lightgray;
        }

        .header {
            background-color: black;
            color: white;
            text-align: center;
            padding: 20px;
        }

        .banner {
            background-color: orange;
            color: white;
            text-align: center;
            padding: 30px;
        }

        h2 {
            text-align: center;
            color: darkblue;
        }

        .section {
            background-color: white;
            padding: 20px;
            margin: 15px;
            border: 1px solid gray;
        }

        .program {
            display: inline-block;
            background-color: lightblue;
            padding: 15px;
            margin: 10px;
            width: 180px;
            text-align: center;
        }

        .program:hover {
            background-color: orange;
            transition: 0.5s;
        }

        table {
            width: 100%;
