HEALTHY FOOD HUB

Healthy Food and Nutrition Website

Consolidated Project Report

B.Tech CSE Student | Web Development Project

HTML + CSS | Beginner Web Development Project

1. Project Overview

Project name	Healthy Food Hub – Healthy Food and Nutrition Website
Objective	To create a website displaying food categories, healthy recipes, daily meal plans, nutrition information, and healthy eating tips.
Technologies used	HTML for webpage structure and CSS for styling, layout, hover effects, and responsive design.
Design theme	Dark green, light green, white, and pale green backgrounds for a clean food and nutrition theme.

2. Webpage Preview

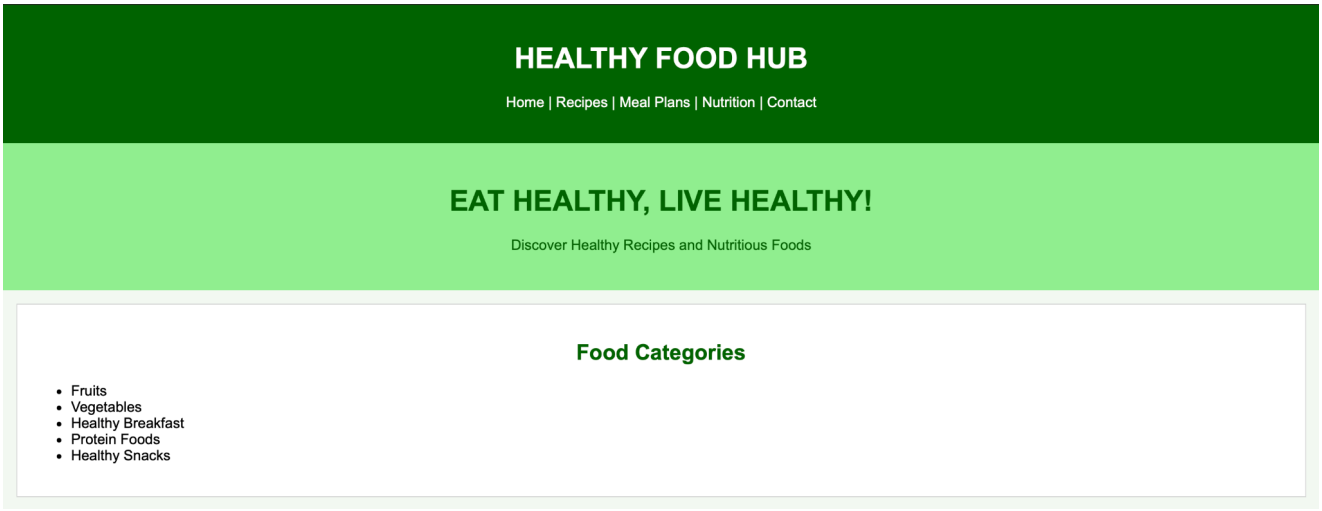

Figure 1. Actual Healthy Food Hub webpage preview supplied by the user.

3. Main Features

Feature	Description
Header and navigation	Displays the HEALTHY FOOD HUB heading and navigation links for Home, Recipes, Meal Plans, Nutrition, and Contact.
Welcome banner	Displays the EAT HEALTHY, LIVE HEALTHY! heading and a message about healthy recipes and nutritious foods.
Food categories	Lists Fruits, Vegetables, Healthy Breakfast, Protein Foods, and Healthy Snacks.
Healthy recipes	Displays Vegetable Salad, Oats Breakfast, and Sprouts Bowl with ingredients, calorie information, and descriptions.

3. Main Features

Feature	Description
Daily meal plan	Shows breakfast, lunch, snacks, and dinner with their food items and calorie values in a table.
Healthy eating tips	Provides tips such as drinking enough water, eating fresh fruits and vegetables, avoiding excess junk food, eating balanced meals, and exercising regularly.
Hover effects	Food cards change their background color when the user moves the pointer over them.
Responsive layout	CSS media queries adjust food card width for screens with a maximum width of 600 pixels.

4. HTML and CSS Summary

HTML defines the website header, navigation menu, welcome banner, food categories, healthy recipe cards, daily meal plan table, healthy eating tips, and footer. CSS controls the green color theme, typography, spacing, food cards, tables, hover effects, and responsive layout.

5. Limitations

The website uses static sample information in the HTML. No database, user login, dynamic meal-plan generation, or backend system is connected. Recipe details, ingredients, calorie values, and meal-plan information must be updated manually in the source code. The page is a front-end demonstration rather than a functioning nutrition management platform.

6. Conclusion

The Healthy Food Hub is a beginner-friendly static webpage demonstrating HTML and CSS concepts. It organizes food categories, healthy recipes, meal plans, and healthy eating tips in a green-themed layout. Hover effects and responsive styling improve the webpage presentation, while a backend or database can be added later to support dynamic content.

Appendix A – Source Code

Original HTML and CSS source code supplied by the user. Long lines are wrapped for page display.

```
<!DOCTYPE html>
<html>
<head>
    <title>Healthy Food and Nutrition</title>

    <style>
        body {
            font-family: Arial;
            margin: 0;
            background-color: #f2f8f2;
        }

        .header {
            background-color: darkgreen;
            color: white;
            text-align: center;
            padding: 20px;
        }

        .banner {
            background-color: lightgreen;
            color: darkgreen;
            text-align: center;
            padding: 25px;
        }

        h2 {
            color: darkgreen;
            text-align: center;
        }

        .section {
            background-color: white;
            margin: 15px;
            padding: 20px;
            border: 1px solid lightgray;
        }

        .food-card {
            background-color: #e8f5e9;
            display: inline-block;
            width: 220px;
            padding: 15px;
            margin: 10px;
            border: 1px solid green;
            text-align: center;
            vertical-align: top;
        }

        .food-card img {
            width: 150px;
            height: 110px;
        }

        .food-card:hover {
            background-color: lightyellow;
            transition: 0.5s;
        }

        .calories {
            color: red;
            font-weight: bold;
        }

        table {
            width: 100%;
            border-collapse: collapse;
        }

        th, td {
            border: 1px solid black;
