GAMING AND ESPORTS COMMUNITY WEBSITE

Gaming Community and Tournament Information Webpage

Consolidated Project Report

B.Tech CSE Student | Web Development Project

HTML + CSS | Beginner Web Development Project

1. Project Overview

Project name	Gaming and Esports Community Website
Objective	To create a gaming portal containing popular game profiles, esports tournament schedules, team information, player profiles, leaderboards, and gaming news.
Technologies used	HTML for webpage structure and CSS for styling, layout, hover effects, and responsive design.
Design theme	Dark background with black, lime green, cyan, purple, and grey sections for a gaming-focused appearance.

2. Webpage Preview

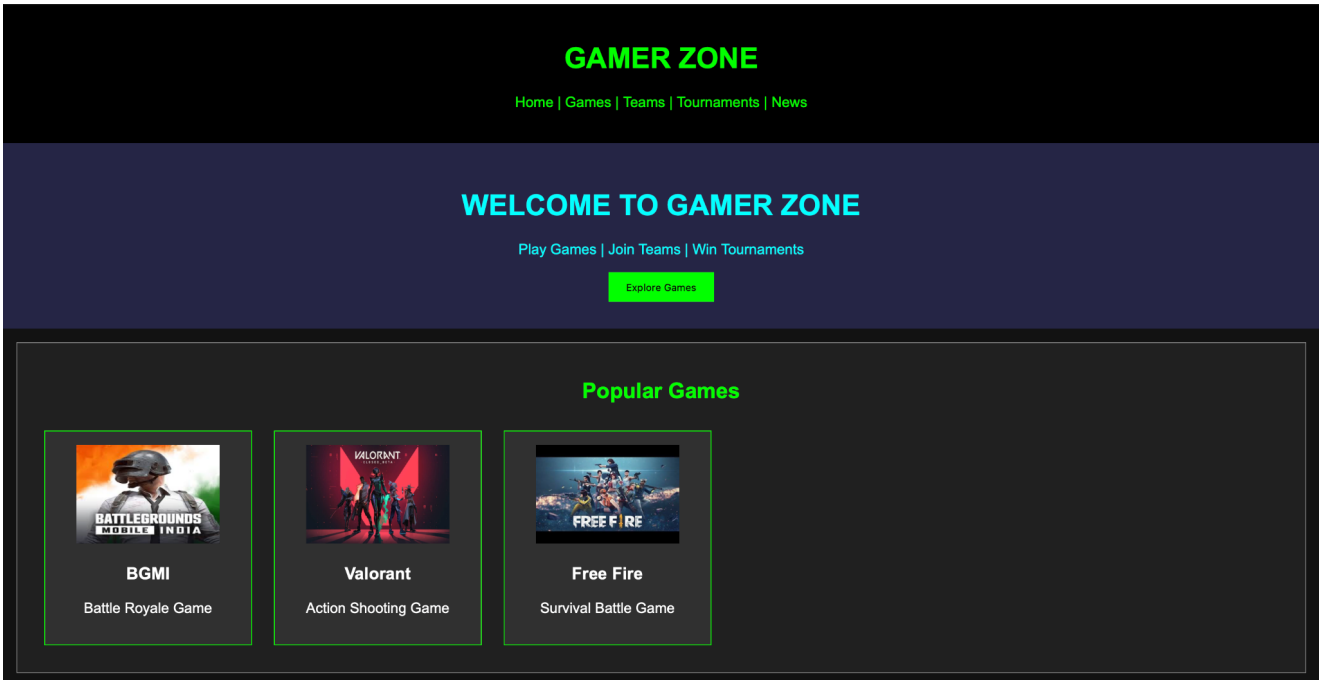

Figure 1. Actual webpage preview supplied by the user.

3. Main Features

Feature	Description
Header and navigation	Displays the GAMER ZONE heading and navigation links for Home, Games, Teams, Tournaments, and News.
Welcome banner	Displays a welcome message, gaming tagline, and Explore Games button.
Popular games	Displays BGMI, Valorant, and Free Fire with images and short game descriptions.
Tournament schedule	Shows tournament names, dates, and associated games in a table.

3. Main Features

Feature	Description
Gaming teams	Displays Team Alpha, Team Warriors, and Team Legends with their respective games and player counts.
Top players	Highlights Player 1, Player 2, and Player 3 with their teams and ratings.
Gaming leaderboard	Presents player rankings and points in a structured table.
Latest gaming news	Displays tournament announcements, game updates, and team championship news.
Responsive layout	CSS media queries adjust card widths and table text size for smaller screens.
Hover effects	Cards change background color on hover, and the button changes color when hovered.

4. HTML and CSS Summary

HTML defines the website header, navigation menu, welcome banner, popular game cards, esports tournament schedule, gaming teams, top players, leaderboard, latest gaming news, and footer. CSS controls the dark background, lime and cyan text colors, typography, spacing, cards, tables, hover effects, and responsive layout.

5. Limitations

The website uses static sample information in the HTML. No database, user authentication, live tournament feed, or backend system is connected. Game details, tournament dates, player ratings, team information, leaderboard points, and news must be updated manually in the source code. The page is a front-end demonstration rather than a live esports platform.

6. Conclusion

The Gaming and Esports Community Website is a beginner-friendly static webpage demonstrating HTML and CSS concepts. It organizes popular games, tournament schedules, teams, players, rankings, and gaming news in a dark-themed layout. Hover effects and responsive styling improve the presentation, while a backend or database can be added later to support live updates and interactive features.

Appendix A – Source Code

Original HTML and CSS source code supplied by the user. Long embedded image data is visually wrapped to fit the page; join wrapped segments to reconstruct the original line.
